

Tobias Ishiwu

Full-Stack Software Engineer · MERN Specialist

Enugu, Nigeria | tobyishiwu@gmail.com | +234 706 695 8826 | github.com/Tobyishiwu | tobyishiwu.tech

SUMMARY

Full-stack software engineer with 3+ years of experience building production web applications end-to-end on the MERN stack. Track record shipping real-time platforms with live geolocation tracking, payment flows, and role-based multi-tenant systems, primarily for African market products. Comfortable owning a project solo, from database schema design through deployment and post-launch debugging.

TECHNICAL SKILLS

Frontend	React 19, Vite, Tailwind CSS v4, Framer Motion, Redux / Context API
Backend	Node.js, Express, REST API design, JWT auth, role-based access control
Database	MongoDB & Mongoose, MySQL
Real-time & Maps	Socket.io, Leaflet, OpenStreetMap / Nominatim geocoding
Integrations	Cloudinary, Resend, Paystack / Flutterwave, PDF generation, OTP (Termii)
DevOps	Vercel, Render, Hostinger, Git/GitHub, CI-style deployment workflows

FEATURED PROJECTS

MoveIt — On-Demand Courier Delivery Platform

[MERN](#) · [Socket.io](#) · [Leaflet](#) · [Solo build](#) · [moveit-zeta-sandy.vercel.app](#)

- Built an African-market courier platform (inspired by Gokada/MAX) end-to-end solo: customer, rider, and admin experiences on a single role-based auth system.
- Implemented live GPS rider tracking with Socket.io and Leaflet/OpenStreetMap, broadcasting location updates in real time per active delivery.
- Designed a dynamic fare engine calculating price from live-geocoded distance (Nominatim) and parcel weight, replacing an initial flat-rate model.
- Diagnosed and resolved a cross-domain cookie authentication issue in production by moving API calls through a same-origin Vercel proxy.
- Built an admin dashboard for rider verification, order oversight, and revenue reporting.

Zenith Spa — Luxury Mobile Spa Booking Platform

[MERN monorepo](#) · [Client project \(US-based\)](#) · [zenithspa.online](#)

- Delivered a production booking platform with an admin dashboard, paginated order management, and automated PDF generation.
- Integrated Cloudinary image uploads and a Stripe-adjacent payment flow with automated email confirmation on approval.
- Diagnosed and fixed three separate production bugs: an ES Module dotenv load-order failure, a global Content-Type header silently breaking multipart uploads, and a duplicate CORS registration causing intermittent 500 errors.

Otrace — B2B Pharmaceutical Marketplace

[React](#) · [Node/Express](#) · [MongoDB](#) · [Africa-focused](#)

- Conducted a full backend audit before writing any frontend code, uncovering a schema/enum mismatch that was silently breaking every marketplace endpoint.

- Built the marketplace homepage and product listing pages with debounced search and URL-synced filter state.

Oru Aka — Marketplace for Nigerian Tradespeople

MERN · Socket.io · Cloudinary · Termii OTP

- Built a 'LinkedIn for tradespeople' platform for Enugu, Lagos, and Abuja with real-time chat, phone OTP verification, and tiered worker verification.
- Implemented an admin approval queue for verifying tradesperson accounts before marketplace access.

PayFlow — Nigerian Fintech Banking App

MERN · Hostinger (api.tobyishiwu.tech)

- Led a full mobile-first UI overhaul, converting the app to a bottom-navigation layout.
- Diagnosed and fixed a critical beneficiary-ordering bug traced to incorrect timestamp field usage in query logic.

ADDITIONAL PROJECTS

Kenebi Health — telemedicine booking platform (Laravel, React, Agora.io video) · SchoolSync — multi-tenant SaaS for Nigerian schools (Django REST, Express, React) · TaskFlow, QuizMaster, MedBook — full-stack applications across the DRF/Express/React stack.

EDUCATION

Bachelor's Degree · Self-taught software engineer with 3+ years of hands-on production experience.
